

ADOBE
FLASH PLAYER

The following information will help you to navigate our website and place an order.

First, because our site uses JavaScript and the frame creator uses Flash player, you will not be able to use the site to its fullest on a tablet or phone.

From a PC or MAC, make sure the browser you are using is either Chrome or Firefox. Both of these browsers are free to download if you do not have them installed.

For Chrome Users:

From the customize and control google chrome icon, select Settings, Advanced - under the privacy and security tab, select Content Settings. JavaScript should be allowed, and adding www.gnpframe.com to the allowed section will also help. (you can add any site here that requires JavaScript to save you going through these steps again).

In this same menu option, Flash should also be allowed as ask first, and again adding www.gnpframe.com to the allowed list will help. (you can add any site here that requires Flash to save you going through these steps again).

For Firefox Users:

From the Firefox menu select Add Ons, Plugins and make sure Flash is installed and enabled.

For Javascript in Firefox, follow the instructions in this link: <https://www.whatismybrowser.com/guides/how-to-enable-javascript/firefox>

Once you have completed the changes above, close and restart your browser.
